New Screen Magazine

No. 73

One

AVIATOR COMPTE, at a great risk of life, flew from Thun to Engelberg in the Swiss Alps and gave the world the first motion pictures ever made of the impressive mountains.

The vampire of jewels is the diamond and there are many wondrous specimens of this stone including the Cullinan worth \$5,000,000 and weighing one and one-third pounds, the Regent, a million dollar stone and the famous Hope blue diamond, which has a revolution, the loss of two kingdoms, five executions and four starvations to its discredit.

The Vincent Dahlia farm, near Baltimore, is the home of countless thousands of this wonderful flower, in almost endless variety.

Nitrogen iodine is the most sensitive explosive known. Tickling it with a feather or moving the table on which it rests will explode it but while it is still it is harmless.

In addition to the above subjects, new screen magazine No. 73 contains a collection of laughographs, or humorous excerpts culled from papers and magazines.

This document is from the Library of Congress
“Motion Picture Copyright Descriptions Collection,
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.

Class L Finding Aid:
